

Where is the best place to play?

Clean Air Clues

Some places have cleaner air, and some places have dirtier air. Clean air helps our lungs stay healthy. Dirty air can make it harder to breathe.

Your Task

Look at the pictures below. Each picture shows a different place where you or other children might play.

Look for the clues that show the air might be **clean**:

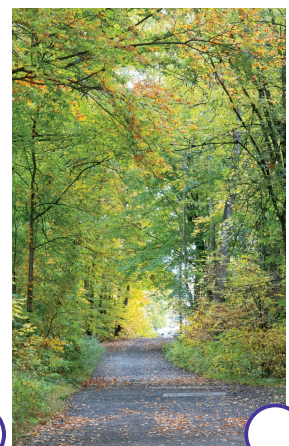

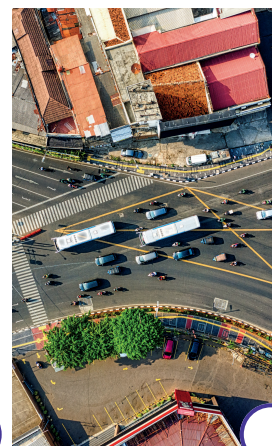

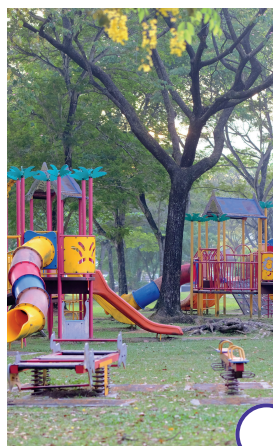

- Trees and plants
- Open spaces
- Fewer cars
- People walking or cycling

Look for the clues that show the air might be **dirty**:

- Lots of traffic
- Smoke or fumes
- Cars with engines running
- Busy roads

Choose the best place

Tick the place where you think the air is cleanest and safest to play.

Draw one thing that could make any place cleaner and safer to play.
