

Design a Clean Air Town

Use the blank town map to design a cleaner, healthier place to live.

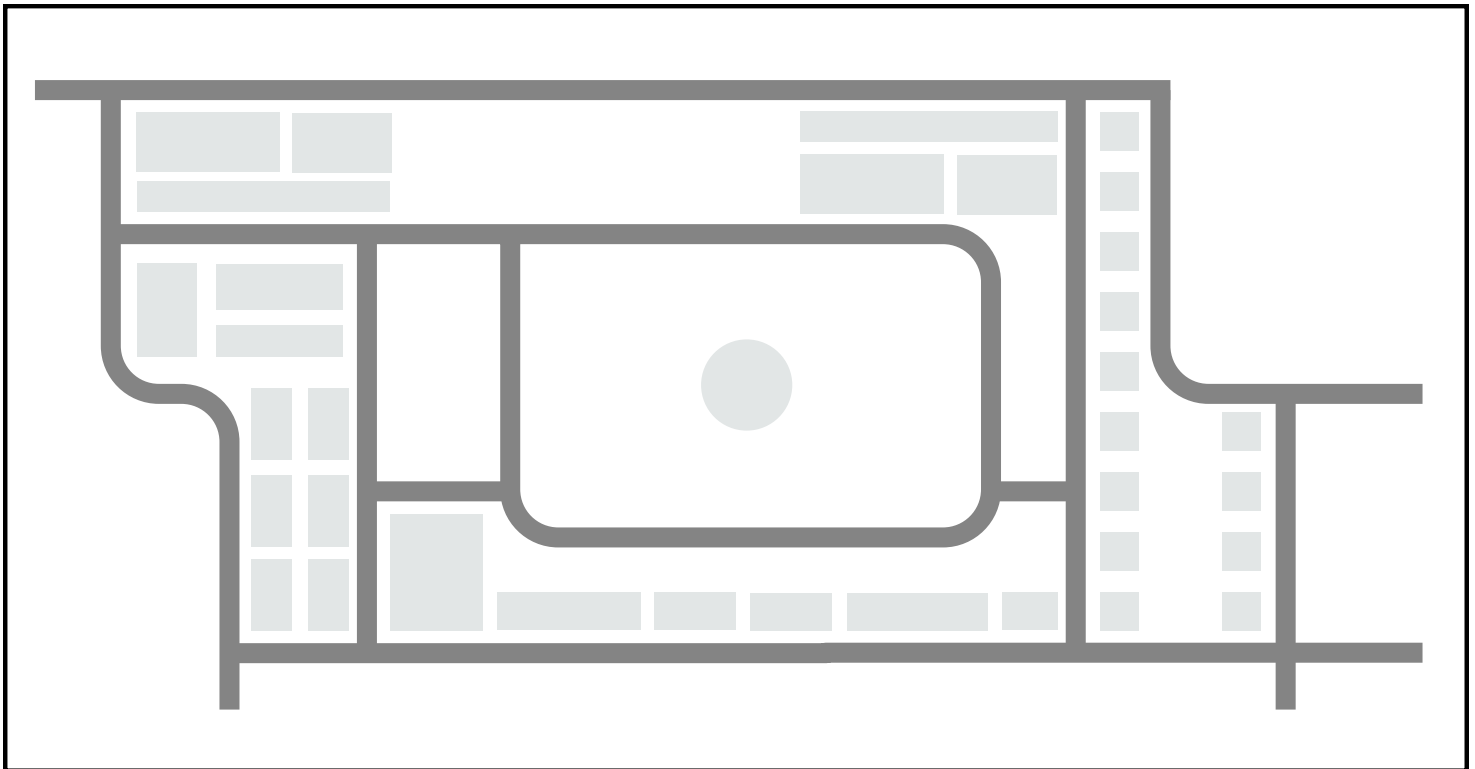

Add these features to your map. Draw the following icons and place them where you think they will help most.

Think like a town planner. Use the Air Pollution Fact Sheet to help you choose the best clean air solutions:

- Where is pollution likely to be the highest?
- Where do children spend time?
- Where should clean air solutions go?

Icons to include:

- Trees and green spaces
- Cycle paths and footpaths
- Clean Air Zone signs
- Electric vehicle charging points
- Bus stops and public transport
- 'No idling' zones
- Pedestrian-only areas

Explain your choices

Write two short explanations:

One change I made was

This helps reduce pollution because

.....

Another change I made was

This helps reduce pollution because

.....
