

Our achievements

Support...

In 2021:

Our helpline team supported over **34,000** people.

15 million people used our website for expert health advice.

We helped more than **500** people through our support groups.

Research...

Over the last 40 years, we've invested **more than £100m** in research funding.

We've helped develop better treatments for children with pneumonia.

We've uncovered encouraging evidence about a new drug that could potentially treat Mesothelioma, a killer lung cancer.

We've funded projects looking into better diagnosis of Covid-19.

Campaigns...

We enabled a change in the law so that it's illegal to smoke in cars with children.

We were influential in getting lung health to be prioritised by the NHS.

We successfully campaigned for an ambitious Clean Air Zone in Birmingham.
